

## Re-Submission

- ✳ The design engineer is required to provide a re-submittal and comment response letter for the initial plan review. This may be emailed to the Public Utilities Department at:  
[PUDevelopment@joliet.gov](mailto:PUDevelopment@joliet.gov)
- ✳ The changes to plans must be demarcated on the drawings to highlight changes. The reviewer again has 48 hours to review the resubmission for completeness. The 10-working day clock is triggered again after the 48-hour evaluation period.
- ✳ Missing information from the initial submission needs to be provided before a new review can begin.
- ✳ The developer generally provides up to three submissions. Those submissions are usually enough to resolve outstanding issues. There are times where submissions are poorly done and fall far short of meeting the intent of Joliet's requirements. In those cases, additional fees are assessed to the developer.
