

TO: James V. Capparelli, City Manager

FROM: William Evans, Chief of Police

DEPARTMENT: Police

SUBJECT:

Citywide Surveillance Camera Map

PURPOSE:

To better aid the police department in locating privately owned surveillance camera systems to review crime footage.

FACTS:

- a) The project will allow detectives to see where surveillance systems are in proximity to a crime scene, thus saving the workforce hours needed to canvas an area.
- b) Various colored "pins" on the map will allow the user to identify what type of system is in a particular area (i.e., Ring doorbell, outdoor surveillance, indoor surveillance, etc.).
- c) Sworn members will have the ability to access the map from any device with basic internet access, giving greater ease of use to members in the field.
